| CONE BIOPSY: | 35618 |
| DIATHERMY of CERVIX: | 35644 |
| COLPOSCOPY: | 35614 |

ON DISCHARGE

There will be a watery pink/brown discharge for several days to weeks following your treatment, longer if you are post-menopausal.

If this becomes offensive in smell, or discoloured (yellow or green), please telephone the rooms as this can be a sign of infection. This is easily treated with antibiotics, but it is preferable to start treatment early. Should antibiotics be required we can fax a script to your preferred Pharmacy allowing you to commence treatment on the same day so please ensure you have the pharmacy name, address, phone and fax numbers available when you call.

If you wish to go swimming in the 10 days following your treatment, please gently insert a tampon to swim and remove it immediately upon leaving the water. After this time you can go swimming as you would normally.

Avoid sexual intercourse for 4 weeks.

A post treatment appointment will be scheduled for you 12 months after your treatment date.

If after your discharge from hospital you experience grave concerns, at any time, always call the Rooms on 9389 5065 and you will be directed to the appropriate contact number.
